

STÖGER Monitoring System

Efficient process monitoring made easy. With our intelligent monitoring system, you can control and monitor STÖGER devices precisely and reliably. It captures, stores, and analyzes all process-related data, ensuring full traceability at any time.

Advantages of the STÖGER Monitoring System (SMS):

- + Maximum Flexibility & Easy Integration – Modular design adapts to your needs
- + Smart Data Management – Efficient, demand-driven processing
- + User-Friendly Interface – Intuitive operation for both users & maintenance teams
- + Flexible Visualization – Centralized & decentralized options available
- + Remote Maintenance – Boosts efficiency & system uptime
- + Safety First – Fully compliant with current safety standards
- + Seamless Data Connectivity – Supports OPC-UA, MQTT & more
- + Built-In Documentation – Everything you need, right at your fingertips

Your Application, Your Choices.

Flexible Options	SMS	SMS 1-4	SMS 1-4 Dual Servo
Integrated drives	✗	✓	✓
Maximum screw spindles	4	4	4
Maximum feeding units	4	4	4

Visualization Concepts

Our control system offers you customized visualization solutions for intuitive and efficient operation. Choose the optimal option for your application:

Web Visualization

- + Supports common web browsers such as Edge, Chrome, etc.
- + Up to 4 clients (browsers) per SMS simultaneously
- + Utilization of existing operator PCs within the system
- + Advantageous for monitoring multiple systems after commissioning
- + Can be combined with an integrated control panel and/or handheld device

SMS Integrated Control Panel 10.1"

Optional

- + Multi-touch technology for intuitive operation
- + Ideal for SMS stand-alone use
- + Integrated solution within the Electric cabinet
- + Can be combined with web visualization and/or handheld device

SMS Handheld Device 10.1"

Optional

- + Supports common multi-touch technology for intuitive operation
- + Ergonomic design
- + Ideal for use with multiple SMS devices during the commissioning phase
- + Can be combined with web visualization and/or integrated control panel
